NORTHWEST REGION

November 21, 1984

Mr. Gary Calaba  
Department of Environmental Quality  
Post Office Box 1760  
Portland, OR 97207

Dear Gary:

This letter is to confirm our telephone conversation of November 20, 1984 concerning five hazardous waste drums at the Intel Aloha facility that have exceeded or are approaching the 90 day storage limit. All the wastes were generated on a one-time basis, and are awaiting approval of waste profile sheets before being shipped to Chem-Security Systems, Inc. in Arlington for disposal.

The wastes are as follows:

<u>Waste name</u>	<u>Drums</u>	<u>Date Accumulation Start</u>	<u>Date Profile Submitted</u>	<u>Profile Sheet Number</u>
Carbon Tetrachloride waste	2	8/10/84	10/3/84	E04186
Chlorobenzene spill cleanup	2	8/24/84	10/4/84	E04038
Reject solvents	2	9/1/84	10/3/84	E04193

The wastes will be shipped for disposal as soon as possible after profile sheets are approved.

Sincerely,

John Harland  
Senior Facilities Engineer

JH/ga
